At Fuzzy's Taco Shop, we strive to create great-tasting, enjoyable meals for each guest every time they visit our restaurants. We also know that each guest has their own unique and individual dietary needs and restrictions. In order to provide the best service and experience possible to our guests, we have identified those products that contain one or more of the eight major food allergens identified by the U.S. Food and Drug Administration. These allergens are: milk, eggs, fish, crustacean shellfish, tree nuts, wheat, peanuts, and soy beans.

However, we also want to warn our guests that products may come into contact with other foods, to include allergens, during the preparation process. The information here is based on standard recipes and product formulations, but does not account for hand-made preparation techniques, personalized ingredient modifications, addition of other condiments, product testing, supply sources, and any other food items that a guest may add to their order. These additions may contain one or more of the eight major allergens or any other allergens. Therefore, the possibility exists that an individual product may contain allergens even though they are not listed as ingredients of the product in the chart above.

Due to the individualized nature of food allergies and food sensitivities, Fuzzy's Taco Shop, its franchisees, and its employees do not assume responsibility for a particular allergy or sensitivity to any food provided in our restaurants. We encourage our guests with food allergies or other dietary restrictions to consult with their physician regarding their diet. Unless stated otherwise, the allergen information contained on this website is correct as of January 2022.

The nutrition information is based on standard product formulations and on the average values for ingredients from Fuzzy's Taco Shop's suppliers throughout the United States. The nutrition values have been rounded in accordance with the U.S. FDA National Labeling and Education Act guidelines. These values also do not account for hand-made preparation techniques, personalized ingredient modifications, addition of other condiments, product testing, and supply sources. Regional and seasonal differences may also affect the nutrient content for each product.
